

CASE STUDY

Cloud-based point of sale (POS) development for a global hardware manufacturer and supplier

The client

One of the well-known 20 year old POS hardware manufacturers and suppliers in Asia-Pacific region having offices in USA, Australia, New Zealand, Singapore, Malaysia, Mauritius, India, and Middle Eastern Countries. Our client's POS hardware are used in large banks and in the world's top retail chains.

Business situation

The client was looking for an online cloud-based POS system that could be customized with the POS hardware device manufactured by them. The client's requirement was to build a system that could address all the areas of concern where their devices are installed. A common interface to handle sales, purchase, products, inventory, customers, staff, accounts, and reports.

The challenges

Identification and aligning the processes into fine modules and understanding the connectivity was a challenge. The system had to keep track of everything

- Invoice raised for purchase, material inward to inventory tracking
- Product descriptions: from sales invoice to customers loyalty points
- Employee Management: from payroll to accounts
- Banking, journals, assets, and liabilities

The solution

Briskon developed an online cloud-based POS system in line with the client's requirement following a neatly defined agile project plan. Modules were designed, developed, deployed, and tested in a real-time environment. Client's involvement enhanced our productivity and we walked through a win-win situation.

Key features captured with our solution:

- Multi store/franchise management
- Multi user running on multiple devices
- Interfaces/communicates with POS peripheral
- Online connectivity with payment gateways
- Product management
- Inventory management
- Sales
- Discount sale
- Purchases
- Customer management
- Staff management
- Leave management
- Payroll processing and accounting
- Superannuation/EPF accounts and payments

The benefits

Simplified accounting process

Inventory management, tracking bigger sells and identifying reorder point is one click away

Easy to track employees with multiple pay run system

Generate error-free purchase/sales invoices

Fast processing of discount sales

Better resource utilization

Increased revenue
